PROFILE SUMMARY

AI & ML Engineering student experienced in building end-to-end AI systems using LLMs, RAG, and scalable full-stack architectures, with a strong interest in applied AI and real-world problem solving.

EDUCATION

B.TECH IN AI & ML

Kongu Engineering College

April 2027

CGPA: 8.2/10

HSE & SSLC

Kongu Kalvi Nilayam Matriculation Higher Secondary School

May 2023

90.5%

EXPERIENCE

Ai-Powered Content Generation Platform

AI Project

-PunchBix Intern | Software Developer

May 2025 – July 2025

- Built a full-stack AI platform using Gemini 1.5 pro LLMs and diffusion models to generate high-quality text, images, and multilingual content.
- Engineered a Node.js backend for secure API management and credit tracking, coupled with a React.js frontend for live markdown editing.
- **Tech Stack:** React.js, Node.js, Express, MongoDB, Gemini, Stable Diffusion.

PROJECTS

Next-Gen Automated Interview Hub

AI Project

- Built a proctored multi-round mock interview platform with instructor assignment, full-screen monitoring, and secure student evaluation.
- Integrated AI-based resume analysis, technical questioning, coding challenges, and memory-driven interview interactions simulating real HR interviews.

Tech Stack: LangChain, LangGraph, Llama, React.js, Flask, MongoDB, OpenCV, Docker

🔗 Mock Interview Platform

AI-Powered Face Recognition & Photo Management Platform

AI Project

- Built a face recognition system to match a reference image against large photo collections and automatically retrieve all identified images.
- Implemented a full-stack platform with face-based search, duplicate detection, batch processing, and cloud-based photo retrieval.

Tech Stack: React.js, Flask, MTCNN, FaceNet, OpenCV, Google Drive API, CLIP

🔗 Face Recognition Platform

Intelligent Cybercrime Analysis System

AI Project

- Developed a Hybrid RAG-based cybercrime analysis system mapping incidents to IPC/IT laws, reporting portals, and required evidence using Knowledge Graphs.
- Added predictive risk analysis and automated follow-ups to guide victims through complaint filing and post-incident actions.

Tech Stack: React.js, Node.js, LangGraph, Neo4j, Flask, LLMs, Redis, Whatsapp Api

🔗 Cyber Safety System

Ticket Booking Chatbot for Museum

Full Stack

- Developed an AI-powered WhatsApp and web chatbot enabling end-to-end museum ticket booking using LLMs and Retrieval-Augmented Generation (RAG).
- Integrated secure payments, geolocation services, session handling, and automated email confirmations.

Tech Stack: LangChain, Llama, Express.js, MySQL, Razorpay, WhatsApp API,

Llama Index

🔗 Ticket Booking Chatbot

CERTIFICATION

- MongoDB Certified Associate Developer
- Oracle AI Foundation Associate 2025.

AREAS OF INTEREST

- Machine Learning
- Agentic AI Development
- DBMS

SKILLS

LANGUAGES

- Java, Python

FRAMEWORKS

- React, Flask
- Express.js, Node.js
- Langchain, TensorFlow

DATABASE

- SQL, MongoDB
- Vector DB

TOOLS & PLATFORMS

- Git, Vercel
- Render, Postman

MEMBERSHIP

- **2024-2025** Computer Society of India - Executive Member
- **2024-2025** Robotics Club - Member
- **2025-2026** Cloud Users Club - Executive Member

AWARDS

- **1st Prize** SRCAS Hackathon
- **1st Prize** Hackvotrix25 Hackathon
- **1st Prize** Project Presentation Newells'25
- **1st Prize** Project Presentation
- **2nd Prize** Hacknovate25 Hackathon
- **2nd Prize** IBM-GenAi Hackathon
